How to Integrate Emerge with Rubin with Google Classroom

Add an Emerge with Rubin item to a Google Classroom course

1. Visit learning.rubineducation.com, log in and click My Programs to find Emerge with Rubin. Click and go to the Emerge with Rubin home page.
2. Click inside a content block (ex: Email Etiquette – Beginner).
3. Click on an item from inside the content block (ex: Reading, Video, Activity/Assignment).
4. Once on the page of the item you selected, copy and paste the URL.
5. Head over to your Google Classroom course.
6. Click create and choose **Assignment**.
7. Name the Assignment whatever you would like (ex: the name of the Emerge with Rubin item).
8. In the instructions area, paste the link you copied from Emerge.
9. Add additional information like Points and Due.
10. When students click on the Emerge link, they will first be asked to log into Emerge (if they aren't logged in already). Once logged in, they will be taken directly to the URL you selected to find and complete the work.

WRITE WELL, OPEN DOORS!
